CHAPTER-1

PROJECT DESCRIPTION

1.1 WHAT IS THE PROJECT ABOUT

The title of project is Responsive Bakery Website. This webpage includes a home, product, about, gallery, team, review, order. This webpage is created by using

- HTML
- CSS
- JAVA SCRIPT

A responsive bakery website built using HTML, CSS, and JavaScript would provide an excellent user experience across all devices. The website would be designed to adapt to different screen sizes, making it easy for users to access and navigate the website, regardless of the device they are using.

The website's home page would include an attractive header with a high-quality image of the bakery's signature item and a navigation bar. The navigation bar would have links to the bakery's products, menu, about us, and contact pages. The website's layout would be organized and visually appealing, with images of the bakery's products displayed prominently.

The products page would feature the bakery's items categorized by type, with descriptions and prices. The menu page would have the bakery's menu, including the daily specials. The about us page would feature the bakery's history, mission statement, and a picture of the bakery's team. The contact page would have a form for customers to send inquiries and the bakery's location and phone number.

The website's design would be complemented by JavaScript functionality, including a slide show of the bakery's featured products on the home page, an interactive menu that highlights the bakery's daily specials, and a responsive navigation bar that adapts to the screen size.

Overall, a responsive bakery website using HTML, CSS, and JavaScript would provide an excellent user experience for customers seeking to explore the bakery's products and services.
